

# SOUFIANE AMAJAT

Full Stack Developer

+212689398453 | amajatsoufiane@gmail.com | Casablanca, Morocco | [linkedin.com/in/soufiane-amajat](https://www.linkedin.com/in/soufiane-amajat) | [github.com/soufiane-amt](https://github.com/soufiane-amt)

## SUMMARY

- Full-stack developer with **TypeScript**, **React**, **Next.js**, **Nest.js**, **Prisma**, **PostgreSQL**, and **Docker**.
- Worked and contributed to 22+ projects (3 large, 9 medium, 10 mini) collaborating with 13 teammates.
- Looking for projects where I can build useful applications, make a real impact, and keep improving my skills.

## EXPERIENCE

### Full Stack Developer Intern

August 2024 – December 2024

Flow Digital Transformation

Rabat

- Resolved 30+ bugs in an ERP system using **Next.js**, **Nest.js**, and **PostgreSQL**.
- Collaborated with a 7-member development team and followed **Scrum** methodology.
- Tested and debugged backend services and frontend components to ensure system quality.
- Participated in code reviews and applied modern development practices.

## TECHNICAL SKILLS

- **Programming Languages:** TypeScript (Advanced), JavaScript (Advanced), HTML/CSS (Intermediate), Java (Intermediate).
- **Frameworks/Libraries:** React (Advanced), Next.js (Advanced), Nest.js (Advanced), Tailwind (Intermediate), Bootstrap (Novice).
- **Developer Tools:** Git (Advanced), Node.js (Intermediate), Docker (Intermediate), CI/CD Pipelines (Novice).
- **Testing Frameworks:** Jest (Intermediate), JUnit (Intermediate).

## PROJECTS

### SoukNova — Solo Project, TS, Next.js, Nest.js, React, PostgreSQL, Docker

3 months

- Engineered a full-stack e-commerce platform featuring JWT authentication, a product catalog with 300+ items, shopping cart, order management, and responsive UI.

### Transcendance — Team Project, TS, Next.js, Nest.js, React, PostgreSQL, Docker

5 months

- Developed a real-time multiplayer Ping Pong web app with integrated chat in a team of 4.
- Built a chat system with public, private, and password-protected channels, including direct messaging and user-blocking features that handled WebSocket communication for 30+ concurrent users.
- Implemented PostgreSQL database and security measures including SQL injection prevention and password hashing.

### Inception — Solo Project, Docker

3 weeks

- Deployed a secure Docker-based infrastructure (NGINX, WordPress, MariaDB) with TLS and hardened permissions, achieving 1% downtime and reducing deployment time by 90%.

### My Portfolio — Solo Project, React, Bootstrap

2 weeks

- Designed a personal portfolio showcasing 16+ projects with clean UI and responsive design.

### Webserv — Team Project, C++, Git

6 weeks

- Orchestrated development of a custom C++ HTTP server handling 100+ concurrent connections in a team of 3.

## EDUCATION

### 1337 IT School

Khouribga

Intensive project-based training in software engineering and system administration.

August 2021 – December 2025

### Hassan II University

Casablanca

Economic studies (2 years).

October 2019 – May 2021

## LANGUAGES

English (C1), French (B2), Arabic (C2)
